

Supply Chain Breakdown: Paneled Half-Sleeve Shirt

Cotton Farming

The Cotton fibers used to make the plaid flannel fabric comes from farms in both Brazil and Australia. We use "The Better Cotton Initiative" to connect us with farms that support farmers and the environment.

Fabric Mill

The fabric used in this shirt was Manufactured at "Envoy Textiles" in Bangladesh. Envoy textiles uses measures to utilize less energy, less water, and produce less carbon emissions through their manufacturing process.

Garment Construction

Finally, This Shirt was made at "Fast Retailing Company" Factory in Bangladesh. Fast Retailing Company is a fully unionized workplace with high-tech machinery.

Shirt Design

This shirt was designed by our team at Uniqlo Headquarters located in New York, USA.

Supima Cotton Farming

The supima cotton used to make our jersey cotton fabric was sourced from farms in the southwest of the United states. We use family farms that have been in operation for generations and use technology that save on water waste.
